

Northwest Nazarene University

Great minds • Great hearts • Great futures

Earn High School and College Credit in Centennial High School! Through a partnership between Centennial and Northwest Nazarene University, you can start college now, gaining experience as a college student and receiving college credit while taking advanced high school classes at Centennial High School.

To Register

Students enrolled in a concurrent credit course at Centennial High School will have the opportunity to register after the 2008-09 classes begin. Registration forms will be available in the above classes, or register online at www.nnu.edu/concurrentcredit.

Tuition

Tuition for concurrent credit courses is **\$65.00 per credit**. Tuition is payable with registration by check, cash, or debit/credit card. There is also a monthly payment plan available either from the concurrent instructor or the NNU concurrent credit office.

For More Information

See **Student Guide** (available from your instructor, counselor, the NNU concurrent credit office or the NNU website) for more information:

- Registration procedures and policies
- Tuition and payment policies
- Dropping a course
- Grading and transcripts
- How to transfer credits to the college or university you plan to attend
- NNU accreditation information

Course Descriptions

BI 222. General Biology II: Foundations of Molecular and Cellular Biology (3 credits)

A survey of the basic concepts of biology with emphasis on cellular processes, genetic principles and man's place in nature. This course is designed for students who intend to major in the sciences and those in pre-medicine and related fields. **Corequisite:** BI 222L.

BI 222L. General Biology II: Foundations of Molecular and Cellular Biology Laboratory (1 credit)

A Laboratory study of the basic principles of biology with emphasis on cellular processes, genetic principles and man's place in nature. **Corequisite:** BI 222.

EN 102. English Composition (3 credits)

A course intended to develop in students college-level writing skills and stimulate them to think critically, express themselves clearly, and develop an appreciation for the medium of language through a variety of writing experiences. For the course to count for General Education requirements, a student must earn a grade of C- or better.

PH 111. College Physics I (3 credits)

A comprehensive non-calculus based approach to the fields of physics. Designed for students whose career goals are architecture, business, physical therapy, science education, and pre-medicine. Emphasis is placed on problem solving. Topics covered include mechanics, heat and thermodynamics, sound, electricity and magnetism, light and optics, and modern physics. **Prerequisite:** MA 130, 140; or, equivalent to high school algebra and trigonometry. **Corequisite:** PH 111L.

PH 111L. College Physics Laboratory I (1 credit)

The laboratory uses the discovery approach to physical principles. The laboratory will cover basic labs in mechanics, wave motion and heat. **Corequisite:** PH111.

SP 101, 102. Elementary Spanish (4 credits each)

For students who wish to begin the study of Spanish. The acquisition of basic vocabulary sounds and structures with emphasis on conversation. An introduction to Spanish and Hispano-American cultures.

SP 201, 202. Intermediate Spanish (4 credits each)

For students who have had at least two years of high school Spanish or one year of college Spanish. A refinement of basic skills and structure with continued emphasis on conversation and increasing emphasis on composition and reading. **Prerequisite:** SP 102 or equivalent.

*Classes subject to change for 2009-2010 school year
